ROVER "Director"

COFDM Video Receiver

The **Rover "Director"** is a truly portable, easy to use, hand held receiver with a 7" full colour monitor.

Using the latest digital COFDM transmission techniques the '**Director**' features dual channel diversity reception to give exceptional performance in the most challenging conditions.

In addition to its internal rechargeable battery the '**Director**' has an external V-lock battery docking port. The IDX-type V-lock facility provides for easy, rapid battery changes with operation times in excess of five hours. An optional sun visor enables outside viewing in diffused sunlight or in bright studio lighting.

The integrated monitor displays video in either 4 : 3 or 16 : 9 format in normal or zoom modes. Up to sixteen channel settings are available via a simple rotary switch. Composite video output is available via a BNC. External DC input and internal battery charging are via simple side-mounted connectors.

The antennas can be detached for storage or transportation in the supplied carry case.

Specifications:-

RF Inputs	: Dual Diversity Antennas	Power B	: 12 V DC from ext' dc supply
Display	: 7" Wide screen LCD monitor	Current	: 1.4 A @12V DC
Video O/P	: Composite Video via BNC	Dimensions	: 285mm x 170mm x 70mm
Power A	: 14.8 V battery	Weight	: 2 kg
